SCIENCE OF LIFE - Reel V.

How Plants and Animals Cause Disease. ✓

Parasitism is explained by animated drawings showing how the mistletoe attacks and lives upon the oak tree. Photo-micrographs and drawings show bacteria, how they feed upon and poison animal or plant life, and how they multiply. Types of bacteria and the diseases they cause; how they invade live tissue; antiseptics. Animal parasite illustrated by malarial plasmodium in red blood corpuscle. Bacterial development in liquids; sterilization. Bacterial infection of teeth; action of white corpuscles, tuberculosis vacilli. Another excellent film for classroom use in high schools.
